

FoilFastener

FIXES FOIL FIRMLY TO TIMBER WALL STUDS

One hit with a hammer, twist the strip and you are ready to fix the next. FoilFasteners are available in bulk cartons of 500 in strips of 10 fasteners.

For durability information, please refer to **Corrosion Resistance of MiTek Metal Connectors**, available on the MiTek website at mitek.com.au

USES

→ Quick and easy way of fixing foil products to timber structures.

ADVANTAGES

- Large surface area gives a more superior hold than staples and clouts.
- Reduces tearing.
- Easy to attach to hardwood or pine.

SPECIFICATIONS

Steel Grade	G300
Thickness (Total Coated)	0.8 mm
Galvanised Coating	Z275
Size	25mm diameter
Product Code	FF

This Certified Engineering Building Product complies with the National Construction Code and Australian Standards.
