

MiTek Jack Table

Suited to the construction of small trusses:
jacks, saddles, creepers

The MiTek Jack Table is a quick and nimble platen press ideally suited to the construction of small trusses: jacks, saddles, creepers, etc. The Unistrut rails matched with a HDPE plastic top provides a quality working surface that accommodates tooling for larger trusses.

FEATURES

- Quick and nimble platen press.
- Fully integrated safety light curtains.
- 50T pressing capacity.
- Optional slotted top for tooling
- Suits all small truss types

PHYSICAL DATA

Available sizes	<ul style="list-style-type: none">→ Table Dimension: Choice of 6.1 m (20'), 7.3 m (24'), 9.1 m (30') Length x 1.8 m (6') wide→ High speed travel of press head with ramped acceleration.→ Simple controls.→ Pressing capacity of 50T, depth limited to prevent crushing of timber.→ Platen Size: 1.88 m x 0.30 m (20.15 m x 0.30 m is pressing surface)→ Auto-raising of platen.→ 2-handed optical touch buttons activate pressing motion for added safety and control.→ Laser scanners detect obstructions and trigger E-stops if necessary.5kW hydraulic motor
